September 20, 1972

Mr. William Dick
P.O. Box 67
Downingtown, Pennsylvania 19335

Dear Mr. Dick:

Inspection of the former lagoon site on your property on August 25, 1972 and this date shows the revegetation conditions to be unsatisfactory.

Although there are places in which the cover is good, there are several areas in which the cover and vegetation is very sparse or non-existent; thus contributing to some erosion of the soil.

Accordingly, please reseed these areas with a fast-growing cover, such as perennial rye-grass, before inclement weather begins.

If you have any questions, please contact me by phone or at the above address.

Very truly yours,

Richard A. Casson
